

Integrated cutting systems

At the heart of our **Nemesis** and **Athena** integrated cutting systems are the **Europa** and **Europa Pro** cutter rails. These are available in a range of sizes and are guaranteed straight to 1mm and 0.2mm respectively. A pair of integral lift mechanisms and a full length aluminium base create a fixed docking station that can be attached to an existing work table or to our **Atlas Table**. A narrow groove safely accepts the blade tip during cutting. Three full length silicone grip strips, two on the cutter and one on the base, aid clamping and help protect the surface of the material being cut.

The cutters can be removed from their docking stations for use elsewhere. In the case of the **Athena**, the locating spindles can be removed leaving the table completely clear for other purposes.

The **Nemesis** and **Nemesis Pro** use a three piece base that fastens with screws to the table top.

The **Athena** and **Athena Pro** use a series of brackets fitted to the table top. The **Athena** base extrusion fits inside these brackets where it can be adjusted for both level and straightness. A full length measuring scale is included as standard.

Length ✕	Nemesis	Nemesis Pro	Nemesis Table	Athena	Athena Pro	Athena Table
200	4113		4803	4063		4813
250	4114	4124	4804	4064	4094	4814
